

Check 21 POD

Integrated Check 21 is a full featured item processing application that supports the majority of mainstream core processing solutions with integration to more than 20 core applications. It provides the flexibility to operate in virtually any environment, from in-house to service bureau.

Integrated Check 21 is certified for all aspects of Check 21; FedForward, FedReceipt, FedPlus, and FedReturn and provides direct support of electronic inclearing receipt, electronic transmission of outgoing cash letter to multiple end points and all exception/return item processing and management.

Save time and money with Integrated Research. The moment an item is scanned, the electronic image is immediately retrievable by virtually any mix of criteria, such as amount, account, serial, DIN, trancode, etc. Years of images are available, in seconds, from any workstation or through Internet Banking.

Integrated Check 21 POD incorporates character recognition software to perform both Courtesy Amount Recognition and Legal Amount Recognition (CAR/LAR) on all scanned items. With read rates that exceed 90%, the time spent keying documents is significantly reduced.

Integrated Check 21 POD is scaleable to meet your needs. Currently installed in institutions with daily item volumes ranging from 1,500 to 1,500,000 Integrated Check 21 POD has the features and functionality you need to accomplish the task efficiently, accurately, and reliably. Maximize efficiency, improve customer service and begin re-allocating valuable human resources to other areas of your business. Give your entire institution the tools they need to retrieve, examine, make decisions and answer customer inquires right from their desk.
