

## Consulting

IBT has over 27 years of experience in the financial industry. We understand operations and deliver a multitude of financial services today; data, image, ACH, file transmissions from banker's banks, the Federal Reserve and virtually every Tier 1 core application provider in the U.S. market. Our customers use wide variety of mainstream core and ancillary products, giving IBT and you a unique look through the eyes of our clients and your pier's. Use our experience, talk to our clients who are using the core platforms and ancillary products that you are considering. Receive a clear picture directly from a user, not from a contact on a vendor's short list.

IBT can assist with contract evaluation and negotiation, during renewal or new vendor consideration. We know what area's need to be addressed to create value, but also protect you should you decide not to remain in your vendor relationship. IBT's participation will help create an agreement that insures value and keeps your vendor working for you through the term of your agreement.

IBT can help design, plan and implement your network to support the applications you have selected. With a complete understanding of the FFIEC guidelines, IBT can oversee your entire network infrastructure. Through a complete evaluation of your ancillary and core applications, IBT can help you design and select an IT disaster recovery plan that insures regulatory compliance is maintained.

Unlike most companies providing "Consulting Services" IBT is reviewed by the FDIC, OCC and several state regulatory agencies. Consider working with IBT, you will find our approach reflective of someone who walks in the same shoes as you.
